New Ingersoll-Trenton \$5⁰⁰

The Best Seven Jewel Watch \$7⁰⁰ & \$9⁰⁰

Note monogram
on dial

Examine this Movement

Observe that it is a *bridge* model, the very highest type of watch construction, found only in the costliest models of other makers and the feature of *paramount* importance in every watch.

It has 7 ruby and sapphire jewels protecting the points of principal wear, will give 20 years of service. Guaranteed for 5 years.

It has a genuine compensating balance wheel, automatically adjusting itself to changes of temperature; micrometer regulator, permitting the utmost precision in adjustment; the Breguet hairspring—all features distinctive of only the finest watches.

One grade of movement only \$5 in solid nickel case

\$7 in 10 year gold-filled case \$9 in 20 year gold-filled case

Sold by Responsible Jewelers Only

You can examine the "I-T" in your own town at any jeweler's you know to be reputable. You can compare it with other watches and make your own decision before buying.

It is new now, and if not locally obtainable will be sent express paid by us on receipt of price.

See it before you buy a watch.

With the lightest mainspring in any watch of its size, it runs with that full, regular "motion" exclusive to watches of the strictest accuracy and made possible only through fine workmanship, high frictionless finish and best materials.

Accuracy and Appearance

The Ingersoll-Trenton is a watch for the man who is exacting of his time-piece. It is a close timer. It has beauty of movement and case and not only looks like but is a fine watch. The cases are thin and stylish and made in a variety of patterns.

Ingersoll Value in a Fine Watch

Such a watch as the "I-T" could only be produced for the money by the manufacturing systems and facilities that made the Dollar watch possible.

Though of totally different character and built in factories 150 miles apart these watches represent the same value in proportion to price.

The informative "I-T" Booklet "How to Judge a Watch" free upon request.
